RECEIVERS IN BANKRUPTOY.

The following reserved in the partition of the petitioners.

Corn Rallies on Export Sales, With Oats Weak and Provisions Heavy.

at the last to-day on account of 128½ to 123¾ and December 126½ to 126½; corn gained % to % c.; oats lost at % to % and provisions finished nanged to 15 cents lower.

ble to obtain their requirements in market here. Renewed attention was ary Hoover putting stress on a forecast that United States surplus grain would be in demand for Europe. Unil after midday, however, the market had ruled heavy owing to continued big receipts here and to likelihood that, the total primary receipts this week might exceed any previous record. Besides, hedging pressure was much in evidence during the morning and premiums for fancy spring grades were shot to pleces, tumbling 25 cents in some cases compared with Saturday. On the other hand a decided falling off in the amount of hedging sales took place in the last hour; shorts covered freely and commission house demand was said to be of a very good class.

ood class.

Export sales of 500,000 bushels rallied as corn market from the bearish effect f rains, but hedging sales kept oats reak throughout the day.

Lower quotations on hogs acted as a reight on provisions.

England and Germany were the principal buyers in yesterday's cash wheat market, in which sales totalled about 1,250,000 bushels. Grain was sold to other Continental countries and Belgium was reported seeking offers for today for 400,000 bushels of that commodity. Another country inquiring for wheat was Poland. Seventeen vessels with grain will clear Galveston and New Orleans this week. Finland was a buyer of rye yesterday, but no figures of its purchases of that grain were given out. More than 750,000 bushels of rye were worked during the last week. About 200,000 bushels of corn were worked in that period.

Secretary Hoover, who said this plan for perfecting the Governments credit programme for the railroads and the producers would be by far the most expeditious and practical means of effecting the relation now deemed imperative by the President and his Cabinet.

Secretary Hoover's approval was given after returns came from a questionnaire sent out-among representative cotton interests and a study was made of the railroad credit situation. Complete agreement is said to have been reached by the President's special committee to consider cotton loans that this financing is so urgent that it should be linked up with the plan of railroad credit and the finance corporation's authority sufficiently widened to enable it to perform both functions.

A draft of a bill which will be introduced in both houses is now being drawn by the Treasury experts and will be ready for the President's approval in a day or two. Treasury officials were confident that despite the opposition expected to develop among advocates of the Norris plan for-relief of the farmers through creation of a \$100,000,000 corporation that sufficient strength will be mustered to put the proposed legislation through both houses.
